

Dear Commissioners:

Don't prevent states from fixing my cell phone problems. I am writing to oppose CG Docket No. 04-208 and WT Docket No. 05-194, which will unjustly take away the authority of states to tackle problems with cell phone service, including abusive cancellation penalties. Worse, the proposal will put in place a weak set of cell phone company-endorsed rules that offer no improvements in service or enforcement.

It's time to adopt policies that force cell phone companies to improve the level of service they provide to consumers. It is prertty sad that honesty is in very short supply how does america expect god to to keep blessing america when it has to much sin and then promotes it god is not going to keep allowing it he has given warning signs in the bible and the world with all the evil things that are happening it is time for a good honest government to take control everyone new that deregulation was a very bad decision and now everyone is on the greed wagon. can't take money to heaven you can't buy your soul. but you can go to hell if you don't repent of sins and change and except jesus as lord and savior who died on the cross for everyone sins so we all can be saved and have everlasting life with him in heaven and the new earth. great tribulation is coming soon with lies deception and more read the holy bible your past, present and future are in there. all hatred is of man's sin and satan being allowed to have his demons work on people through their minds which you can see through more bad things happening. please don' be part of this greedy world and think and care about people you'll be more blessed and have riches in heaven which is forever.

Although CG Docket No. 04-208 purports to address consumer frustration with confusing cell phone bills, hidden fees and misleading advertising, the proposal does little for consumers. In the name of helping us, the agency is proposing to block states from passing their own pro-consumer laws. As bad, WT Docket No. 05-194 would bar state courts from enforcing state law when it comes to unfair and abusive cell phone contracts. That's going too far.

States are responding to consumer complaints. Don't stop them! And don't give in to adopting weak, industry-drafted rules in their place. The FCC should stand up to the cell phone industry, and respect states rights and strong consumer protections.

Sincerely,
Caryn Baker
